Projects

AFTER LIFE USING ARTIFICIAL INTELLIGENCE AND 2D HOLOGRAM EFFECT - NATURAL LANGUAGE PROCESSING

The main objective of this project is to provide a new way for people to remember and connect with their deceased loved ones. It offers a unique opportunity to revisit memories, have conversations, and gain closure. The hologram representation will be accessible from any location using a digital device, making it a convenient and accessible way to connect with departed loved

ones. The use of AI and hologram technology will allow for a more realistic and immersive experience, creating a more convincing and engaging digital representation of the deceased. Additionally, the technology used will allow for the hologram to adapt and evolve over time, allowing for continued interaction and growth.

This project has the potential to transform the way people approach the concept of death and the grieving process. It offers a new way for people to cope with their loss and to continue to maintain a connection with their loved ones beyond death.

ONLINE SEO MANAGEMENT SYSTEM - SEARCH ENGINE OPTIMIZATION

✓ * A ONLINE SEO AGENCY MANAGEMET SYSTEM IS WEB BASED MVC APP, LICATION. THIS SYSTEM MAIN AIM IS TO MANAGE SEO CENTER AND PROVIDE OTHER FEATURES LIKE SEO INFO , SERVICES LIST , NEWS UPDATES , REGISTRATIONS , CONTACT STAFF , AND B2B MANAGING ACTIVITIES ETC.
